

INSURANCE DISCOUNT AUTHORIZATION FORM

Depending on your auto insurance provider you may qualify for a discount on your comprehensive insurance premium. The National Association of Insurance Commissioners (NAIC) reports that eleven states have regulations that mandate insurance companies to provide vehicle owners with discounts on their comprehensive insurance premiums due to having a vehicle GPS Tracking Device installed within the vehicle. While not all states have regulations, many insurance providers provide discounts.

Please notify your insurance provider that you have a professionally installed GPS Tracking Device for anti-theft recovery and vehicle health monitoring.

cut along dotted line

Dear Insurance Agent,

A GPS Tracking Device has been integrated within my vehicle for active security & real-time location management. This active GPS Tracking System Provides 24/7 e-mail & text message alert notifications for potential theft while my vehicle(s) ignition is not engaged. It also offers proactive vehicle health & management features such a low battery, speed, mileage, and geofence alerts.

This GPS Tracking System qualifies me for the maximum insurance discount mandated by state law in most states and by the insurance companies vehicle asset protection division underwriting guidelines in other states.

(Required by Regulations: Illinois, Kentucky, Louisiana, Massachusetts, Minnesota, New Jersey, New Mexico, New York, Pennsylvania, Rhode Island, and Texas)
